

Temple App Architecture and Service Flow

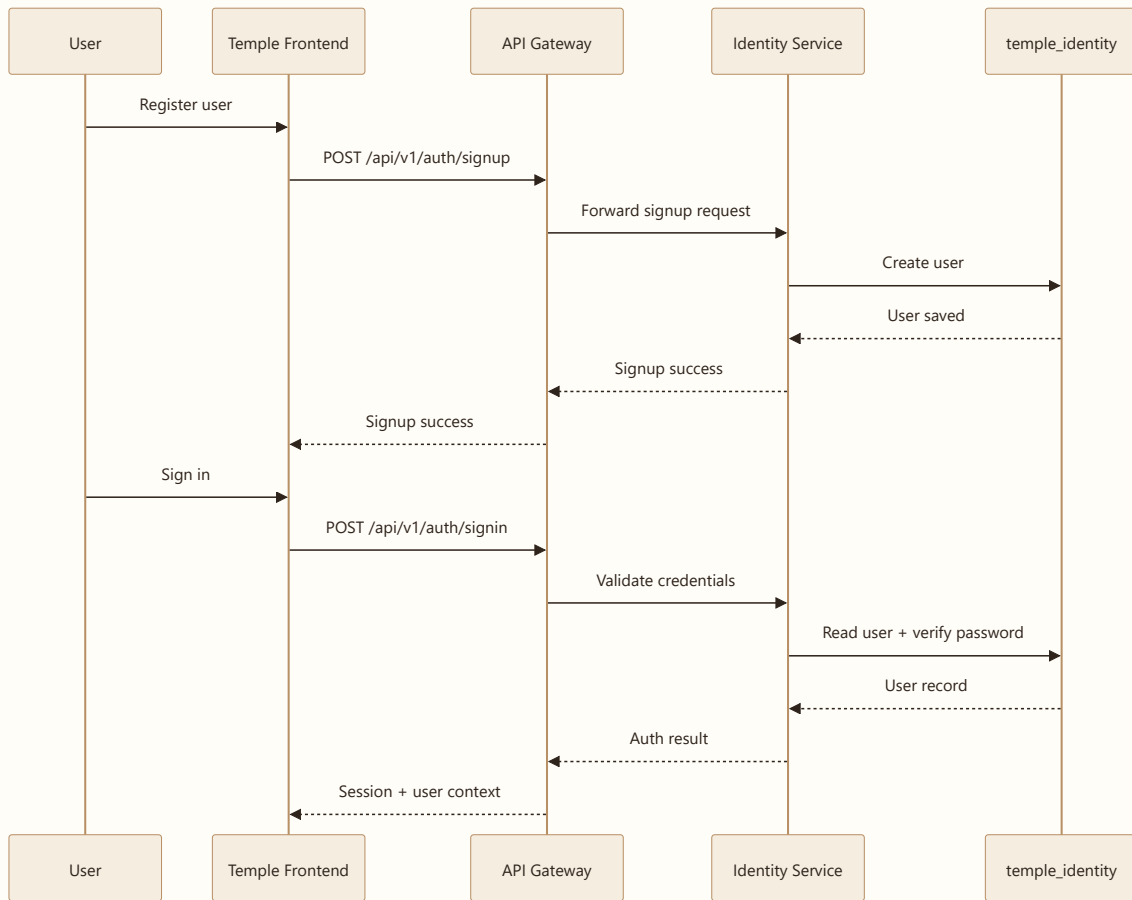

Generated: 2026-05-02

Scope: Multi-temple app with backend temple onboarding, app-level user registration, temple subscription approval, and temple-scoped member experiences.

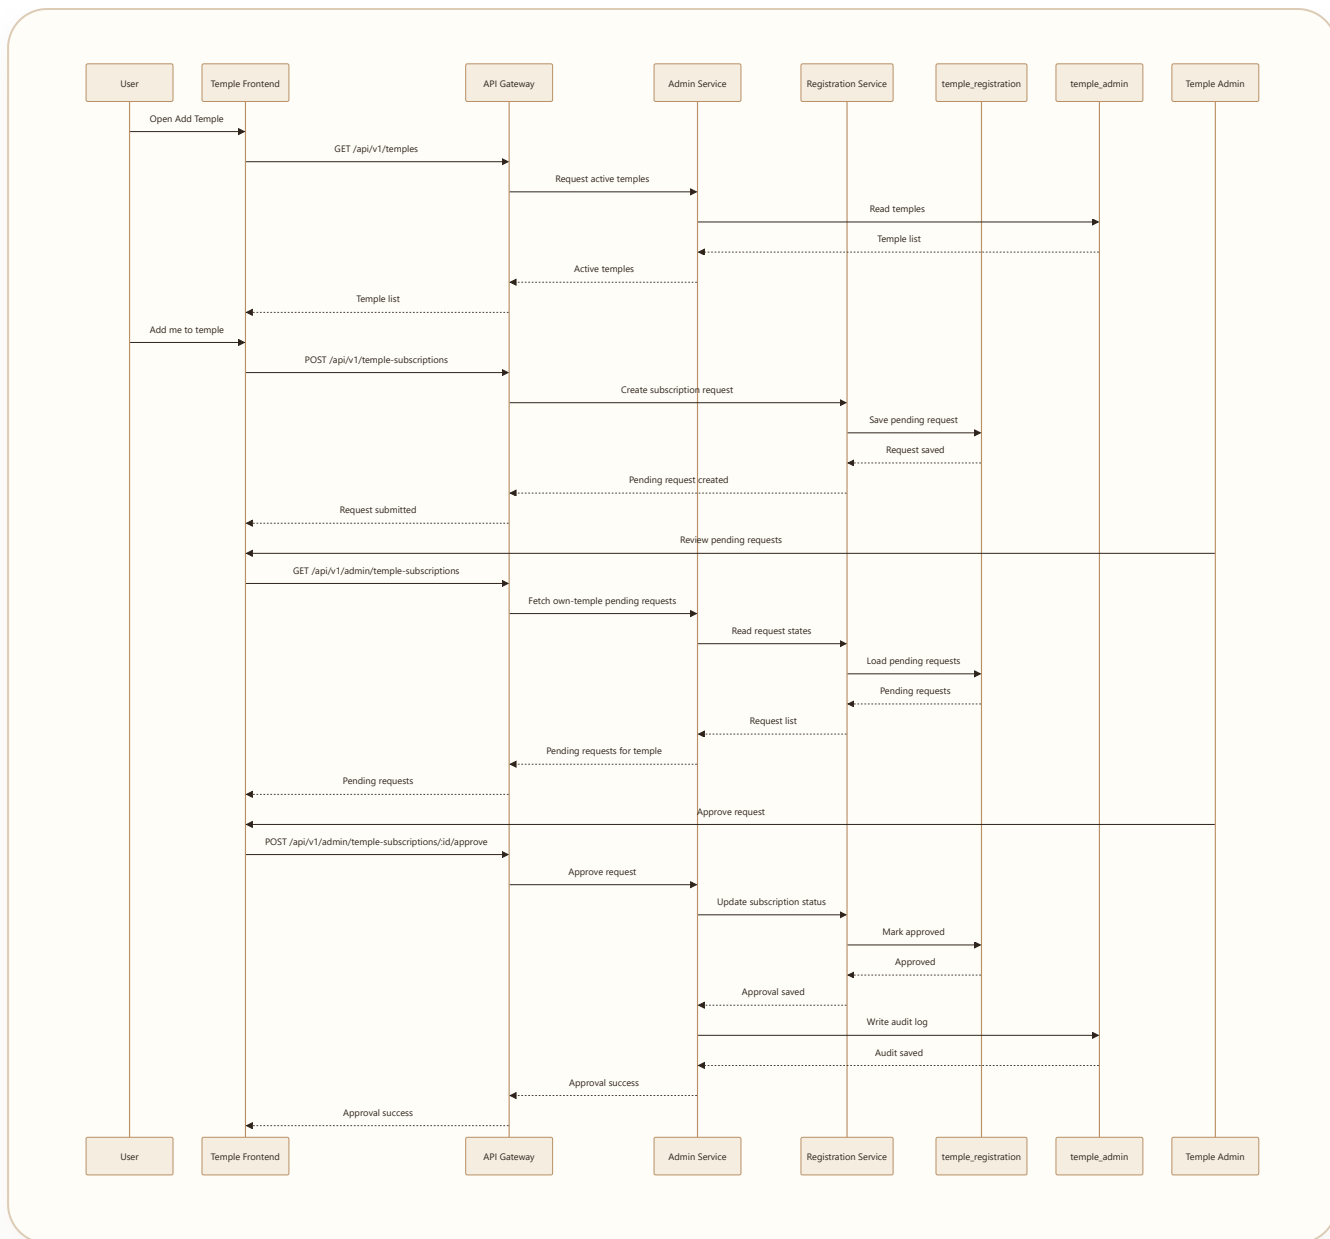

1. Architecture Overview

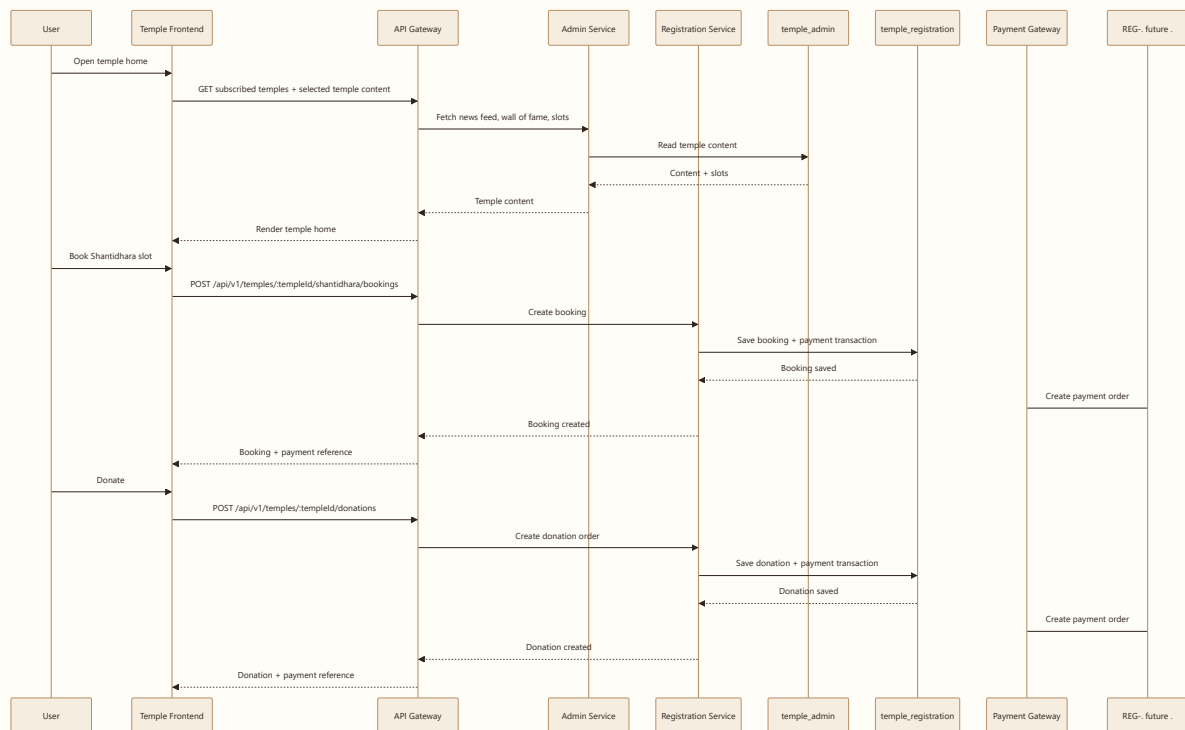

2. Sign-up and Sign-in Flow

3. Temple Discovery and Subscription Approval Flow

4. Temple Home, Booking, and Donation Flow

5. Current Service Ownership Summary

- **temple-identity-service:** app-level registration, sign-in, password verification, sessions.
- **temple-registration-service:** temple subscriptions, Shantidhara bookings, donation orders, payment transactions.
- **temple-admin-service:** temple onboarding from backend, admins, trustees, temple content, slot availability, approvals.
- **temple-api-gateway:** stable mobile API contract and routing to downstream services.
